

# Welcome to Upper Cervical Corrective Health Care

If you have question  
please ask!

# Upper Cervical Corrective Health Care

- As an Upper Cervical Patient you will have first hand knowledge of the healing and health benefits of Upper Cervical Health Care.

# What is Upper Cervical Corrective Health Care?

It is a logical and effective means of resolving most health problems.

# What is its Purpose

Its purpose is to restore the body's natural ability to heal itself.

# The Corrective Procedure

The procedure is designed to correct head/neck misalignment and restore normal brain to body communication.

# Brain to Body Communication

Brain health and healing messages control, monitor and maintain all body functions.

These messages also provide for healing!

# Health and Healing Messages

- Brain health and healing messages leave the brain by way of the brain stem, pass through the neck, down the spinal cord and out over the nervous system to all parts of the body.

# Health and Healing Messages

- The uninterrupted flow of these messages provide for good health.

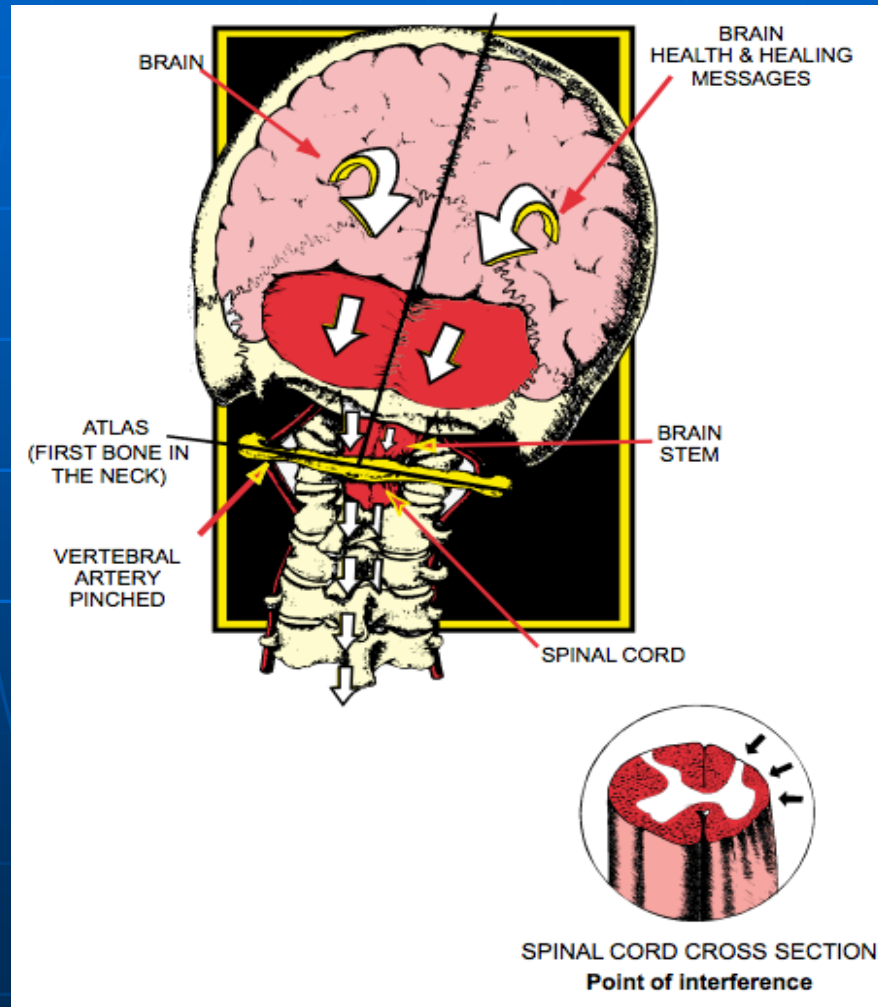

# Head and Neck Misalignment

- Head/Neck misalignment can induce interference at the point where the head and neck join and disrupt or distort the flow of brain health messages to the body.

# Head and Neck Misalignment

- This restriction can prevent the brain from sending its health messages to parts of the body which will allow health problems to develop.

# Head/Neck Misalignment

- When brain health and healing messages cannot get through to all parts of the body due to head/neck misalignment at the point where the head and neck join, serious health problems can develop.

# How is Head/Neck Misalignment Determined?

The doctor will take x rays of the head and neck.

The x rays will show the degree of head/neck misalignment.

# Head and Neck X-rays

The x rays will enable the doctor to develop a correction formula.

The doctor will use the correction formula to restore perfect head/neck alignment.

# Head and Neck Alignment Correction

- The alignment correction procedure is barely felt by the patient and requires no forceful twisting, pulling or jerking motion of the neck.

# Head and Neck Alignment

- . As soon as the misalignment is corrected, the brain will start sending healing messages to that part of the body affected by the misalignment and the body will begin its natural self healing process

# Head and Neck Alignment

On follow up visits the doctor will help the patient maintain their alignment correction so there will be no interruption in the body's healing process until it is complete.

# The 3 Phases of Upper Cervical Health Care

## 1) The Acute Phase

The doctor's first objective is to restore head/neck alignment and reactivate the body's natural self healing process to relieve pain and symptoms as quickly as possible.

# The 3 Phases of Upper Cervical Health Care

## 2) Body Stabilization Phase

The first six to eight weeks after the upper cervical correction is considered a period of stabilization and healing.

# The 3 Phases of Upper Cervical Health Care

## 3) Health Maintenance Phase

Just as you service your car to ensure that it runs efficiently, so it should be with your body. The body has the natural ability to maintain optimal health with periodic check ups.

# Why is Upper Cervical Corrective Health Care So Effective?

# Why is Upper Cervical Corrective Health Care So Effective?

*More than 100 different health problems have responded to this unique approach, yet it remains practically unknown by the general public.*

# Why is Upper Cervical Corrective Health Care So Effective?

When brain health and healing messages cannot flow to all parts of the body due to misalignment interference at the point where the head and neck join, serious health problems can develop.

# Why is Upper Cervical Corrective Health Care So Effective?

- When brain health and healing messages can flow to all parts of the body without interference, the body has the natural ability to maintain optimal health.

# Why is Upper Cervical Corrective Health Care So Effective?

Once head and neck alignment is stabilized, the body resumes its natural self healing process.

# Why Upper Cervical Corrective Health Care Works?

- The body's self healing process continues as long as head and neck alignment is maintained and the brain can communicate freely with all parts of the body without interference.

Upper Cervical Corrective Health  
Care restores the body's  
natural ability to resolve more than  
100 different health problems.

Head/Neck misalignment is  
present before pain and symptoms  
appear!!

# The Bottom Line

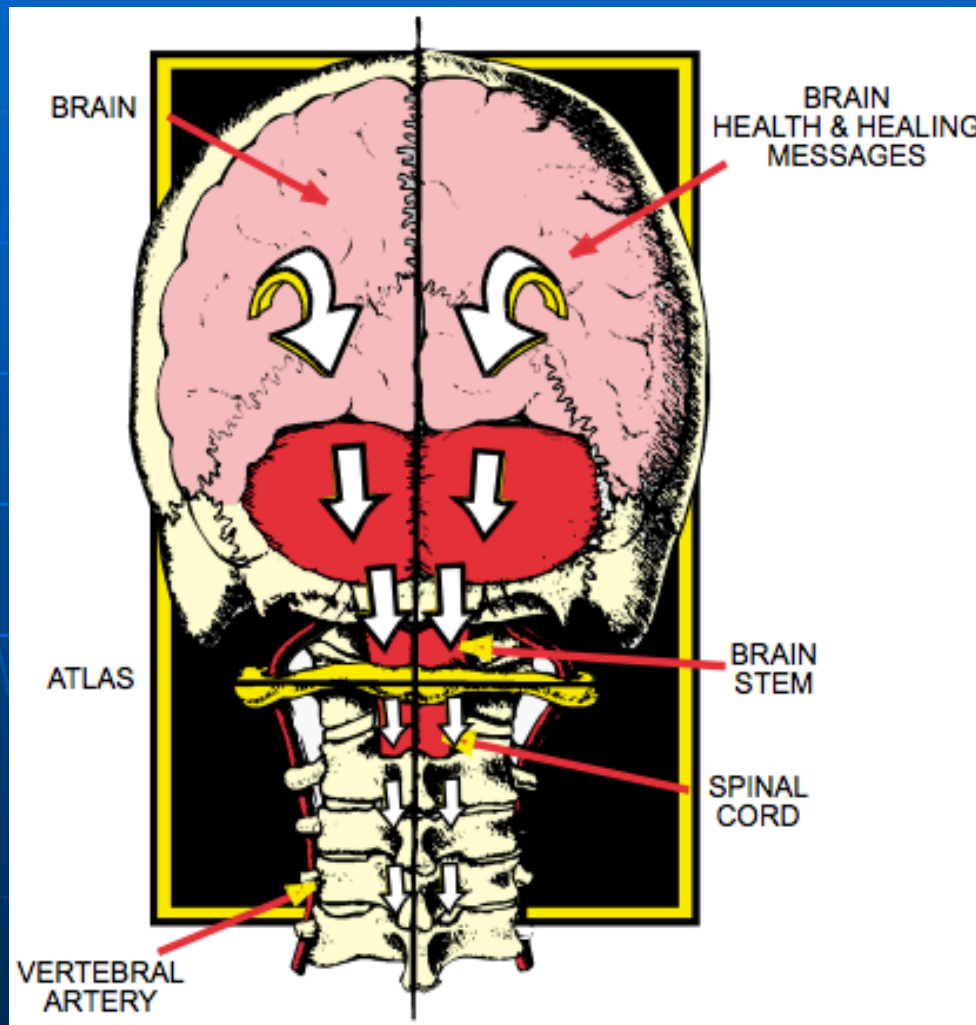

The patient who allows the doctor enough time to correct and stabilize their misalignment correction will realize the best results!!

# Upper Cervical Health Care

Upper Cervical Health Care is a logical and effective corrective procedure that restores the body's ability to resolve most health problems.

- It is safe and effective for children and adults of all ages.

# Head/Neck Alignment

As long as brain health and healing messages can flow to all parts of the body without interference, you can expect good health.

# The Ultimate in Health Care

- The Upper Cervical Alignment Correction enables the body to eliminate minor problems while resolving major health problems.

- Allergies
- Arthritis
- Asthma
- Arm Pain
- Athletic Injuries
- Attention Deficit Disorder (ADD or ADHD)
- Back Pain
- Bed Wetting
- Carpal Tunnel Syndrome
- Cerebral Palsy
- Child Development Problems
- Chronic Infections
- Constipation
- Depression
- Digestive Problem
- Epileptic Seizures
- Ear Infections
- Female Disorders
- Fever
- Flu Symptoms
- Frequent Colds
- Hacking Cough
- Hay Fever
- Headaches (all types)
- Herniated Disc
- High Blood Pressure
- Hip Pain
- Hyperactivity

**No drugs  
No prescriptions  
No surgery**

**More than  
100  
different  
health problems  
have responded  
to the unique  
Upper Cervical  
Corrective  
Health Care  
Procedure  
and  
yet it remains  
relatively unknown  
by the  
general public!**

**It's  
both logical  
and  
effective.**

- Immune System Deficiency
- Indigestion
- Infertility
- Knee Pain
- Learning Disability
- Leg Pain
- Loss of Sleep
- Low Back Pain
- Migraine Headaches
- Multiple Sclerosis
- Muscle Spasms
- Neck Pain
- Nervousness
- Neuralgia
- Neuritis
- Numbness
- Pain (chronic)
- Poor Vision
- Restlessness
- Scoliosis
- Shoulder Pain
- Sinus Problems
- Sore Throat
- Tendonitis
- Tight Muscles
- Tingling Sensations
- T.M.J. Syndrome
- Tourett's Syndrome
- Whiplash
